

Claims

[c1] **What is claimed is:**

1. A device comprising:
a container with a movable platform.

[c2] 2. A device as in claim 1 in which said container is used
for food products.

[c3] 3. A device as in claim 1 in which said movable bottom
moves the contents of said device up and down.

[c4] 4. A device as in claim 1 in which said container is a jar.

[c5] 5. A device as in claim 1 which has a flexible liner within
said container.

[c6] 6. A device as in claim 1 in which said container has an
inner wall and an outer wall and where said movable
platform is the same shape, is perpendicular to and fits
within the inner wall.

[c7] 7. A device as in claim 1 in which a spring is positioned
between said movable platform and the bottom of said
container.

[c8] 8. A device as in claim 7 in which said spring is counter

balanced to the force of the contents of said container so that said movable platform moves up as the contents are removed.

- [c9] 9. A device as in claim 1 in which said container has an inner wall with a plurality of wedges attached to said inner wall.
- [c10] 10. A device as in claim 9 in which said container has material removed from the bottom forming a hole.
- [c11] 11. A device as in claim 10 in which said movable platform is pushed up and onto said wedges through said hole.
- [c12] 12. A device as in claim 9 in which said wedges are 1/3 and 2/3 up the inner wall of said container.
- [c13] 13. A device as in claim 9 in which there are four wedges per level and said wedges are located 90 degrees from the center of said container.
- [c14] 14. A device as in claim 9 which has a flexible liner within said container.
- [c15] . A device as in claim 1 in which said container has an inner wall with a plurality of teeth attached to said inner wall.

- [c16] 16. A device as in claim 15 in which said movable platform has a plurality of slots.
- [c17] 17. A device as in claim 16 in which said movable platform has a pole perpendicular to said platform.
- [c18] 18. A device as in claim 17 in which said slot lines up with said teeth.
- [c19] 19. A device as in claim 18 in which said movable platform is moved so said slots which line up with said teeth with said movable platform being pulled by said teeth and then being turned so the bottom of said movable platform rests on the top of said teeth.
- [c20] 20. A device as in claim 15 which has a flexible liner within said container.
